RECOMMENDATION:

Staff Analysis and Recommendation: Staff recommends Approval.

Criteria for Review: According to Section 35-421, zoning amendments shall be based on approval criteria below.

- 1. Consistency:** The subject property is located within the Medical Center Area Regional Center Plan, adopted in 2019, and is currently designated as “Medium Density Residential” in the future land use component of the plan. The requested “MF-18” base zoning district is consistent with the future land use designation.
- 2. Adverse Impacts on Neighboring Lands:** Staff does not find evidence of likely adverse impacts on neighboring lands in relation to this zoning change request. The proposed use is consistent with the established development pattern of the surrounding area. Surrounding properties include “R-6” Residential Single-Family District and “MF-33” Multi-Family District.
- 3. Suitability as Presently Zoned:** The existing “RM-4” Residential Mixed District and “MF-33” Multi-Family District are appropriate zoning for the property and surrounding area. The proposed “MF-18” Limited Density Multi-Family District is also an appropriate zoning. There is multi-family zoning of the higher density within proximity, and the property is appropriately located along a secondary arterial that can accommodate traffic away from the local streets. The proposed zoning is also consistent with the goals of the Strategic Housing Implementation Plan which encourages the development of alternate housing types to accommodate the city’s growing population at all income levels.
- 4. Health, Safety and Welfare:** Staff has not found indication of likely adverse effects on the public health, safety, or welfare.
- 5. Public Policy:** The request does not appear to conflict with any public policy. Relevant goals and policies of the SA Tomorrow Comprehensive Plan may include.
 - H Goal 2: A variety of housing types (single-family detached, single-family attached, multifamily, as well as ownership and rental opportunities) is available at a variety of price and rent levels.
 - H Goal 5: High-density housing choices are available within the city’s 13 regional centers and along its arterial and transit corridors.
 - H Goal 6: Infill development and revitalized neighborhoods provide a range of housing choices near the city center.

Relevant Goals and Objectives of the Medical Center Area Regional Center Plan may include:

- Goal 4: Foster Innovation
 - Foster an innovative economic environment that leverages world class medical service care providers, education, and research to generate business creating and attract patients, employees, students, and investment from throughout the world.
- 6. Size of Tract:** The 7.9410-acre site is of sufficient size to accommodate the proposed residential development.

7. **Other Factors:** The property is proposed for development of multifamily uses that shall not exceed 18 units per acre. At 7.9410 acres, there could potentially be development of 142 units.

The purpose of the proposed rezoning is to develop a multi-family community with approximately 34- 44 units.

For properties zoned “RM” or “MF” that abut lots zoned residential or are developed with a single family use, the height is restricted to the maximum height of the single family district within 50 feet of the property line.

The proposed rezoning is seeking additional density for use as residential dwelling units. A rezoning application does not allow Short Term Rentals (STRs) as a use by right. Any applicant seeking to operate an STR must follow the appropriate City and Unified Development Code (UDC) processes and is required to apply and qualify for STR permit(s) through those processes. Short Term Rentals are governed by the UDC Section 16.1100. Also see Section 35-374.01 for STR density limitations, Section 35-399 for establishment regulations, and Section 35-482 for procedures regarding consideration of special exceptions.
