Landscaping

In addition to the mandatory landscaping requirements established by §35-511, landscape plans shall be required to earn a minimum of 85 points as awards for elective requirements. Existing trees and understory plants may be preserved to meet this requirement. [note: Tree preservation = 2 to 40 points; Parking lot screening = 25 points; Parking lot shading = 20 to 35 points; Street trees = 25 points; Understory preservation 15 to 30 points – point awarding specified in §35-511]

Example:

Example: Tabulation of Points

Electives	Points
Street trees	25 pts.
Screening of surface parking	25 pts.
Parking lot shading	20 pts.

Parking Lot Screening

All parking areas within ninety (90) feet of the outer IH-10 right-of-way line shall be screened to a minimum height of four (4) feet with earthen berms and/or dense landscaping. This screening shall count as twenty-five (25) points toward the landscaping required.

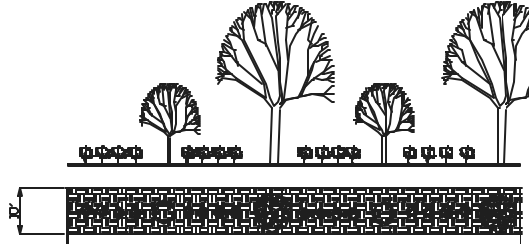

Front natural buffers

Along IH-10, at least seventy-five percent (75%) of the first twenty-five (25) feet of the property must be landscaped with native plant material and native trees. At least seventy-five percent (75%) of trees six inch (6") DBH or greater must be preserved within the first twenty-five (25) feet of the property. Detention and sedimentation filtration areas may be located within the front natural buffer, however, they must be fully screened from public view unless used as a landscape feature. Native understory and tree preservation within the front natural buffer shall count toward the minimum landscaping required above.
