### **Comprehensive Plan**

**Comprehensive Plan Component:** IH-10 East Corridor Perimeter Plan

**Plan Adoption Date:** March 2008

**Plan Goals:**

- Goal 3: Compatibility of Land Uses:
  - Improve the quality of life and safety of residents of the IH 10 East Perimeter Planning area by addressing incompatible land uses.

### **Comprehensive Land Use Categories**

**Land Use Category:** “Urban Living”

**Description of Land Use Category:** Urban Living provides for compact neighborhoods and centralized commercial areas that promote a sense of community and are pedestrian and transit friendly. Centralized commercial centers in this category include the Mixed-Use Center, the Transit Oriented Development (TOD), and the Town Center. Adjacent to these mixed-use commercial areas are less dense Neighborhood Centers, which have a nucleus, or a focal point. Urban Living also provides for form-based development, which emphasizes urban design in the form of regional centers and village development patterns. Mixed Use Centers should be a concentrated blend of residential, retail, service, office, entertainment, leisure, and other related uses at increased densities, where people can enjoy a wide range of fulfilling experiences in one place. Mixed Use Centers are typically located at the intersection of a collector and arterial street or two arterial streets.

Transit Oriented Development includes residential and commercial uses that rely on transit, centralized parking, pedestrian linkages, and an option for bus rapid transit or light rail service.

A Town Center provides a central civic function with mixed uses incorporated into the peripheral development.

Neighborhood Centers have an identifiable nucleus or focal point and edges. Shopping, recreation and services would be accessible by foot or transit. Neighborhood Centers would have a mix of residential uses and an interconnected street network with bicycle and pedestrian facilities. Civic buildings and civic spaces are given prominent sites, and schools and parks are located within walking distance. The edge of the neighborhood is bound by a parkway or boulevard.

**Permitted Zoning Districts:** TND, TOD, MXD, UD, & FBZD

**Land Use Category: “Parks and Open Space”**

**Description of Land Use Category:** Parks / Open Space includes large, or linear, unimproved land where conservation is promoted and development is not encouraged due to presence of topographic constraints or institutional uses on the site.

Parks /Open Space include flood plains, utility corridors, public and private land uses that encourage outdoor passive or active recreation.

Examples include City pocket, regional, or linear parks, as well as private parks associated with subdivisions and neighborhood associations.

**Permitted Zoning Districts:** N/A

**Land Use Category: “Industrial”**

**Description of Land Use Category:** General Industrial includes heavy manufacturing, processing, and fabricating businesses. General industrial uses shall be concentrated at arterials, expressways, and railroad lines. This use is not compatible with residential uses and should be separated from residential uses by an intermediate land use or a significant buffer.

**Permitted Zoning Districts:** C-3, L, I-1 & I-2

**RECOMMENDATION:**

**Staff Analysis and Recommendation:** Staff and Planning Commission recommends Approval.

The proposed land use amendment from “Urban Living” and “Parks/Open Space” to “Industrial” is requested to rezone the properties to “I-1” General Industrial District. “Urban Living” covers a majority of the property and is not an appropriate land use. The surrounding development pattern is “Industrial” and is much more compatible with the area. The subject property is situated on an industrial island with many industrial uses in proximity. Additionally, the property is situated at the intersection of an interstate highway and a secondary arterial which is an appropriate location for the “Industrial” land use designation. A portion of the property is designated “Parks/Open Space”, likely because of the 100-year floodplain. However, measures that mitigate development on that portion of the property could be taken to keep the land use consistent across the property.
