## Pending Prop 1 Acquisitions August 2023

## **Prioritization of Future Acquisition Projects**

- ❖ Evaluate all potential projects on a case-by-case basis
  - Continue utilizing GIS Spatial Model and EAA geological assessments for ranking
  - Monitor and pursue opportunities to strengthen the contiguity of EAPP's portfolio
  - Seek partnership opportunities in Bexar County to leverage funding and maximize conservation benefits
    - Examples:
      - ✓ Occupied karst features = SEP-HCP partnership
      - ✓ Sentinel Landscape Target Area = REPI partnership
  
- ❖ Establish minimum geological assessment ranking of high water quality and high water quantity benefits to proceed with Stage 2 due diligence and acquisition recommendations
  - Consideration for lower ranking projects with bargain sale component on case-by-base basis
  
- ❖ Prepare Development Pressure Heat Map
  - Identify undeveloped properties at high risk for future development within current target area
  
- ❖ Scientific Evaluation Team Input/GIS Spatial Model Updates
  - Potential weighting changes to contributing zone properties and potential expansion of target area
  
- ❖ Proposed FY 2024 acquisition projects are within approved budget and meet prioritization goals
