

Citywide Traffic Analysis

Transportation Department
Item 3

Council Consideration Request

Submitted October 17, 2023, by Council Districts 2 and 7

Background

- Traffic patterns, whether related to the need for traffic calming solutions or the mitigation of congestion, continue to be a growing concern for residents and visitors alike.
- Leads to proactive short and long-term solutions to our growing traffic needs.
- Proactively identify warranted traffic calming solutions, mitigating the need for constituents to request them.

Request

- Conduct a city-wide traffic analysis that:
 - Analyzes existing traffic patterns and identifies areas of the city that experience traffic-related issues
 - Determines recommendations to support long-lasting improvements
 - Is used to support the strategic deployment of appropriate traffic calming applications mitigation measures

Staff Recommendation

- Transportation staff will review past citywide traffic analyses done by other municipalities.
- Review will include estimated costs to conduct a citywide traffic analysis, estimated citywide traffic analysis timeline, and traffic issues addressed by other citywide traffic analyses.

Next Steps:

- Staff recommends referring this item to the Transportation & Infrastructure Committee to determine the scope of work.
