SUBJECT:

SAWS 2022 Water Management Plan Briefing

SUMMARY:

SAWS to provide a briefing on the current status of the development of the 2022 Water Management Plan.

BACKGROUND INFORMATION:

SAWS is undertaking the development of the 2022 Water Management Plan (2022 WMP) which serves as a roadmap for forecasting and planning for the community's long-term water needs. The planning process of the WMP includes reviewing: current population projections to 2075, water equity, the diversified water supply portfolio, managing supplies, conservation and demand forecasting, how climate change may impact water supplies and customer demand, and building regional partnerships, all to ensure water needs are met for SAWS customers, even during the periods of drought.

The plan is generally updated every five years to ensure the community has sustainable and affordable water supplies for generations to come.
