**RECOMMENDATION:**

**Staff Analysis and Recommendation:** Staff recommends Approval.

**Criteria for Review:** According to Section 35-421, zoning amendments shall be based on approval criteria below.

1. **Consistency:** The subject property is located within the United Southwest Community Plan [Plan and is currently designated as “Low Density Residential” in the future land use

component of the plan. The requested “R-6” base zoning district is consistent with the future land use designation.

2. **Adverse Impacts on Neighboring Lands:** Staff does not find evidence of likely adverse impacts on neighboring lands in relation to this zoning change request. The proposed use is consistent with the established development pattern of the surrounding area. Surrounding properties are zoned “R-6” Residential Single-Family District and “MH” Manufactured Housing District.
3. **Suitability as Presently Zoned:** The existing “R-6” Residential Single-Family District is an appropriate zoning for the property and surrounding area. The proposed “R-6 S” Residential Single-Family District with a Specific Use Authorization for Manufactured Home is also appropriate. The proposed manufactured home proposes residential uses, which aligns with the surrounding context. The development will be held to a site plan that will limit the permitted density.
4. **Health, Safety and Welfare:** Staff has not found indication of likely adverse effects on the public health, safety, or welfare.
5. **Public Policy:** ADD

**Relevant Goals and Policies of the Comprehensive Plan may include:**

- GCF Goal 5: Growth and city form support improved livability in existing and future neighborhoods
- Goal 2: A variety of housing types (single-family detached, single-family attached, multifamily, as well as ownership and rental opportunities) is available at a variety of price and rent levels
- H P10: Ensure land use designations and other policies allow for and encourage a mixture of housing types and densities of housing within development projects.
- H P11: Encourage and incentivize new housing development projects to provide a mixture of housing types, sizes and prices

**Relevant Goals and Action Steps of the United Southwest Communities Plan may include:**

- Goal 2 – Housing Encourage the development of new housing that is compatible with the community
- 2.1.2: Discourage mobile homes that are more than eight years old from locating within the community through building code and zoning enforcement

6. **Size of Tract:** The 0.2534 acre site is of sufficient size to accommodate the proposed residential development.
7. **Other Factors:** The applicant is rezoning for installation of a Manufactured Home on the property.

The subject property is located within the Lackland AFB Awareness Zone/Military Influence Area. In accordance with the signed Memorandum of Understanding, JBSA was notified of the proposed request. The Military has indicated that there are no objections to this request.

The purpose of the Specific Use Authorization is to provide for certain uses which, because of their unique characteristics or potential impacts on adjacent land uses, are not generally permitted in certain zoning districts as a matter of right, but may, under the right set of circumstances and conditions be acceptable in certain specific locations.

HUD-code manufactured homes may be located on individual lots outside of a manufactured home park provided they are permanently installed and limited to one home per lot. In addition, they shall be subject to the following standards which are designed to ensure acceptable compatibility in exterior appearance between HUD-code manufactured homes and site-built dwellings that have been or may be constructed in adjacent or nearby locations: HUD-code manufactured homes shall be permanently affixed to a foundation with a visible foundation system and skirting acceptably similar in appearance to foundations of site-built residences. The foundation shall form a complete enclosure under exterior walls. Wheels and axles shall be removed. Each HUD-code manufactured home shall have a sloping roof with eave projections of at least six (6) inches, constructed with material generally acceptable for sitebuilt housing. The pitch of the main roof shall not be less than one (1) foot of rise for each four (4) feet of horizontal run. Any materials that are generally acceptable for site-built housing may be used for exterior finish if applied in such a manner as to be similar in appearance, provided, however, that reflection from such exterior shall not be greater than from siding coated with clean, white, semi-gloss enamel paint. A zoning review is performed by the Zoning Section of the Development Services Department during the review of the plat and building permit.
